Shortages (kekurangan pekerja) di bidang Engineering

S

Shortage

Shortages exist when employers are unable to fill or have considerable difficulty filling vacancies for an occupation, or significant specialised skill needs within that occupation, at current levels of remuneration and conditions of employment, and in reasonably accessible locations.

In some instances, shortages may be apparent in particular specialisations within the occupation, but otherwise shortages are not apparent. In these instances, provided there is sufficient evidence, that occupation will still be considered in shortage.

Occupations facing skills shortages in Australia almost doubled in past year

Of the 20 largest employing occupations, more than half are having difficulties finding workers
